

IMEX Test & Measurement

World-leading oscilloscopes, signal sources, logic analysers and spectrum analysers.

For more than sixty years, engineers have turned to Tektronix for test, measurement and monitoring instrumentation to solve design challenges, improve productivity and dramatically reduce time to market. You can always count on Tektronix to give you the domain expertise, innovation, performance, practical advice and quality you need.

Power analysers, optical measurement equipment, high- and low-speed data acquisition, source-measure units.

Generation after generation of Yokogawa engineers have brought forth truly innovative solutions and have never been satisfied with the status quo. Today over 3,600 Yokogawa engineers worldwide keep pushing the limits, looking for new capabilities and insights that can empower you further.

Power supplies, digital multimeters, signal generators, RF/EMC equipment, precision measurement.

Thurlby Thandar Instruments is an electronic test and measurement company of international standing. TTI designs and manufactures advanced electronic test and measurement equipment. Today TTI is one of the foremost producers of general purpose electronic test instruments and laboratory power supplies in Europe, selling products in over fifty countries.

PC-based oscilloscopes, data loggers, automotive solutions and environment monitoring.

Pico Technology was established in 1991 and soon became a leader in the field of PC-based oscilloscopes and dataloggers. Pico has always been recognised for providing innovative and cost-effective alternatives to traditional test equipment and data acquisition products.

Modular benchtop systems, analog, digital and mixed-signal oscilloscopes, spectrum analyzers, power supplies.

The enduring success of HAMEG instruments is based upon the principles of Sensitivity, Accuracy, Quality and Simplicity. The company's philosophy is to design electronic measurement instruments which not only guarantee excellent performance and reliability, but also offer the greatest possible flexibility.

Ex-demonstration and second-user test and measurement equipment.

IMEX is pleased to offer the following services:

- Ex-demonstration Tektronix equipment
- A large selection of second-user test and measurement equipment

Visit our webshop at www.imexshop.co.uk

Trade-backs and purchasing of unwanted equipment.

IMEX can now, in many cases, offer trade-backs of your old test equipment against new equipment from one of our suppliers listed above. There is also the possibility of selling off your unwanted equipment - please contact us for more details.
